FEBRIAN VALENTINO

Software Engineering Student | AI & Full-Stack Web Development | PHP | Python

Jakarta, Indonesia | +62 813-8308-2315 | febrianvalentino2005@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineering student at Universitas Bina Sarana Informatika (7th Semester) with strong technical foundations in full-stack web development, server-side scripting, and database integration. Certified Program Analyst skilled in creating, building, testing, and troubleshooting responsive websites and web applications using HTML5, CSS3, JavaScript, and PHP. Experienced in interfacing back-end logic with relational databases (MySQL, PostgreSQL, Microsoft SQL Server concepts), ensuring cross-browser compatibility, and adhering to clean web design principles. Combines sharp troubleshooting skills, strong attention to detail, and a collaborative team mindset to manage multi-task workflows and deliver reliable web solutions on deadline.

SKILLS

- **Web Development & Programming:** HTML5, CSS3, JavaScript (ES6+), PHP, Web Scripting (ASP/JSP Concepts), Cross-Browser Compatibility, Responsive Web Design
- **Back-End & Database Integration:** Server-Side Web Logic, MySQL, PostgreSQL, Microsoft SQL Server Concepts, Database Schema Design, RESTful APIs
- **Testing, Maintenance & Design:** System Testing, Web Troubleshooting, UI/UX Layout Design (Figma Concepts), Website Maintenance, Code Refactoring
- **Tools & Development Environment:** Git, GitHub, VS Code, Postman, XAMPP, Microsoft Word, Microsoft Excel, Technical Documentation
- **Professional Strengths:** Multi-Task Management, Deadline Discipline, Cross-Functional Collaboration, Keen Attention to Detail, Fast Learner

CERTIFICATIONS & TRAINING

- Certificate of Competence: Program Analyst (Analis Program) - BNSP / LSP Universitas Bina Sarana Informatika (2026)
- Competency Program: Database Systems (Sistem Basis Data) - G2 Academy (2026)
- Cybersecurity & Network Track (Palo Alto Networks): Cybersecurity Fundamentals, Network Security Fundamentals, Security Operations Fundamentals (2026)
- Software Engineering Intensive Bootcamp Program - Campus / Academy (2026)
- Dicoding Academy Certifications: Front-End Web Development, JavaScript Programming Fundamentals, Programming Basics (2026)

EXPERIENCE

PT. Cipta Teknologi Cendekia - Web Development & Software Engineering Intern

1 Oct 2026 - Present | Jakarta, Indonesia

- Developed MONITA (Monitoring Intern Tracking System), an internal web-based application for company supervisors to track daily intern attendance, log work progress, and manage performance reporting.
- Refactored and enhanced the official company profile website by redesigning raw UI/UX components, optimizing asset delivery, and restructuring frontend code for a polished, modern, and professional aesthetic.
- Collaborated with the software engineering team to refactor web components, optimize database queries, and ensure secure backend server-side logic.
- Engineered responsive UI interfaces and RESTful API workflows to improve operational efficiency and tracking transparency.

PROJECTS

MONITA - Monitoring Intern Tracking System Oct 2026 - Present

Tech Stack & Tools: PHP, MySQL, JavaScript, HTML5, CSS3, Web Layout Design, REST API, Git

- Built an internal web-based intern tracking platform enabling supervisors to monitor daily intern attendance, daily job progress, and activity logs in real-time.

- Implemented secure backend authentication, database structures in MySQL, and intuitive dashboard interfaces for efficient tracking and reporting.

Hostel Barbershop - Web-Based Appointment & Booking Platform Jul 2026 - Sep 2026

Tech Stack & Tools: PHP, MySQL, JavaScript, HTML5, CSS3, Web Layout Design, REST API, Git

- Built and tested a full-stack web reservation platform with dynamic scheduling logic and cross-browser responsive layout.
- Integrated server-side PHP validation and database sanitization pipelines in MySQL to resolve edge cases and ensure system stability.
- Performed end-to-end web troubleshooting, endpoint testing via Postman, and maintained structured technical documentation.

Rose Cafe - Point of Sale (POS) & Hybrid Ordering System Jun 2026 - Present

Tech Stack & Tools: PHP, MySQL, PostgreSQL, JavaScript, UI/UX Design, Server-Side Scripting, Git

- Engineered full-stack web application logic connecting customer QR ordering interfaces with cashier counter checkout systems.
- Designed relational database schemas (MySQL/PostgreSQL) and implemented Role-Based Access Control (RBAC) to secure multi-role web access.
- Collaborated with design and development team members to optimize web layouts, improve response speeds, and maintain website stability.

Who am I? - Real-Time Online Multiplayer Social Deduction Game Aug 2026 - Present

Tech Stack & Tools: JavaScript (ES6+), PHP, HTML5/CSS3, MySQL, Web Troubleshooting, Git

- Architected real-time turn-based web game algorithms and interactive UI state-handling logic for multi-player web applications.
- Conducted thorough cross-browser compatibility testing, script debugging, and web performance optimizations.
- Maintained clean code repositories, task execution logs, and technical update documentation for ongoing site maintenance.

STRENGTHS

- **Full-Stack Web Developer:** Certified Program Analyst adept at building, testing, and maintaining responsive web applications with robust back-end database integration.
- **Detail-Oriented Web Designer:** Strong eye for web layout aesthetics, cross-platform compatibility, and clean front-end interface engineering.
- **Effective Multi-Tasker:** Disciplined in managing concurrent development tasks, troubleshooting scripts, and meeting tight project deadlines.
- **Collaborative Team Player:** Communicates effectively across design, project management, and engineering teams to deliver high-quality web solutions.

EDUCATION

Bachelor of Computer Science in Software Engineering (In Progress) Expected Graduation: 2027

Universitas Bina Sarana Informatika, Jakarta, Indonesia (Semester 7)
